BITMONEY

W H I T E P A P E R

Bitmoney is Next-Gen L1 Blockchain can support short block time and lower fees. The double-sign detection and other slashing logic guarantee security, stability, and chain finality.

TOOLS

- Bitmoney Staking
- Bitmoney Swap
- Bitmoney Wallet
- Conventional Currencies Bridge

BitMoney

1. Blockchain Project: Introducing BitMoney Token with its own blockchain network.

- BitMoney Token is an innovative blockchain project aimed at revolutionizing the cryptocurrency industry. It has developed its own blockchain network that enables fast and secure transactions, while providing users with complete anonymity. The BitMoney Token is designed to be versatile, with numerous use cases ranging from peer-to-peer transactions, e-commerce payments, and even as a means of accessing certain services. With its cutting-edge blockchain technology and user-focused design, the BitMoney Token represents a new era in the world of cryptocurrency

2. Utilities: BitMoney Token offers utilities such as wallets, swapping, and staking.

- BitMoney Token offers several utilities, making it a versatile cryptocurrency. Firstly, it has its own wallet, where users can store and manage their BitMoney Tokens, enhancing security and control of their assets. Additionally, BitMoney Token provides a swapping feature, where users can exchange their tokens with other cryptocurrencies instantly. This feature allows users to diversify their crypto portfolio, thereby mitigating against risk. Finally, BitMoney Token offers staking, which helps users earn passive income by holding onto their tokens for a specified duration, augmenting rewards significantly. The flexibility of BitMoney Token utilities offers users a variety of options to manage their digital assets, thereby enhancing user experience.

3. Mainnet Blockchain: BitMoney Token's mainnet blockchain network provides a bridge to conventional currencies.

- BitMoney Token's mainnet blockchain network is a significant development, providing a bridge to conventional currencies. The platform enables users to convert their BitMoney Tokens seamlessly into their respective fiat currencies, enhancing utility for users. With the mainnet blockchain network, users can trade on peer-to-peer platforms, make purchases on e-commerce stores, and perform other transactions. Additionally, BitMoney Token's mainnet blockchain offers high scalability, security, and speed, ensuring that transactions are completed in seconds while offering top-level security. The BitMoney Token's mainnet blockchain network thus offers users the opportunity to experience the benefits of blockchain technology in everyday transactions without feeling restricted to using cryptocurrencies only.

4. Bridge to Conventional Currencies: BitMoney Token allows for easy conversion to conventional currencies.

- BitMoney Token has developed a mechanism, enabling easy conversion of its token into conventional currencies, thus providing a bridge to traditional financial systems. By offering this conversion mechanism, BitMoney Token has made it more convenient for users to use their tokens in day-to-day transactions. In using BitMoney Token, users can transact on traditional e-commerce stores, pay bills, or even engage in peer-to-peer transactions, without having to worry about cryptocurrency volatility. Furthermore, the conversion process is secure and straightforward, ensuring that users' financial information remains safe. BitMoney Token's bridge to conventional currencies thus offers users an easier, safer and more convenient option to use cryptocurrency in everyday transactions.

5. Payment Solution: BitMoney Token has potential as a future payment solution.

- BitMoney Token has potential as a future payment solution BitMoney Token holds a lot of promise as a future payment solution due to its unique blockchain technology. The BitMoney Token's blockchain network enables fast and secure transactions, without the need for intermediaries such as banks. This means that transactions can be completed within seconds, while being verified for accuracy, enhancing user trust. Additionally, the users' complete anonymity will ensure that their financial information stays secure. BitMoney Token can be utilised in e-commerce transactions, peer-to-peer transactions, and other types of transactions, thus providing versatility. As cryptocurrencies continue to gain traction, the BitMoney Token is well positioned to become a leader in the field of digital payments.

Bitmoney Roadmap

○ PHASE 1

- Launch Bitmoney Token in the BSC network
- Building Based Holders
- Whitepaper Launch
- 500 Holder
- Nomics listing
- Coinmooner listing
- Top 100 token listing
- 15k Mcap Add Lp 1bnb
- Website Launch

○ PHASE 2

- 1000 Holder
- CoinGecko Listing
- Coinmarketcap Listing
- Bitmoney Wallet Launch
- Massive Social Media Marketing
- Bitmoney Staking Launch
- Contract Audit

○ PHASE 3

- Target 3000 Holder
- Facebook ADS
- Tiktok ADS
- YouTube ADS
- Tesnet Launch
- Masive Marketing
- Tesnet Development
- Mainnet Devopment
- Will Update
